## LAWNOWER 1800W

With this self-propelled lawnmower you can count on a powerful 1800W induction motor and a solid steel housing. This means you'll have top quality in hands, as the strong and quiet device can withstand repeated use and any weather condition.

His cutting width of 46cm and large 60 litre grass collector make the POWPG10260 perfect for mowing large lawns in an instant.

The cutting height can be adjusted in 7 positions from 30 to 75mm. So you decide to cut the grass short or longer. Apart from collecting the cuttings into the large grass collector during mowing, you can also go for the mulching option. Grass clippings are mulched into very fine pieces which are excellent to feed the soil in your garden.

Large ball bearing wheels and an adjustable handle height make this solid device highly manoeuvrable. To improve the operator's comfort, the Powerplus lawnmower is equipped with a soft grip handle which is foldable for compact storage. For your safety, it's possible to fit the extension cord to the cable relief. In that way you can never unplug the power cable by accident. A power indicator tells you whether the machine is plugged in.
