

## 'SURREY' 13 m<sup>2</sup>

KIS12220

8445401009184

**GARDIUN is the brand with the most complete range of garden organisation**, the only one that offers products made both of resin and of wood and steel. What's more, for each GARDIUN material there is a **vast number of models, designs and functionalities in different measurements and colours.**

The **"Surrey" model** is a very special shed because it has all the advantages of being **metallic on the inside**, but **on the outside** its **"grained wood" effect** creates a very cosy, rustic feeling. Ideal for decorating any spot in your garden. As it has a **side window** which allows the passage of natural light, you'll find being in its interior a very pleasant experience. What's more, it has **4 vents** so that there is good ventilation whilst avoiding condensation on the inside. So, you can carry out activities inside. It could be a painting or manual crafts workshop or a perfect space for keeping garden accessories and tools, including the lawnmower and bikes. It could be a games room for the kids, a changing room for swimmers and even, if your pool is inflatable, you can keep it folded up with its accessories in this type of shed.

The material its **structure is made of is zinc-plated steel and on its walls and roofs it is galvanised steel.** So, ideal for withstanding extreme temperatures both in summer and in winter and very resistant to corrosion when there is humidity or inclement weather. This shed will be part of your home for a long time. You'll have a **15-year corrosion-proofing warranty!** Now all you have to do is to find a smooth, well-levelled surface to set it up. **Its horizontal panels make it more stable and resistant** than other sheds. Yes, **it needs assembly which is why it includes screws.** Its **door is extra large.** So, you can put large things in it easily. It also has **preinstallation to place a padlock** and make your shed even more private.

From now on your garden will have more square metres available. Because **when everything is in its place, your life gains space.**

### Specifications
