## PLUNGE SAW 20V - POWDP25400

This 20V mini plunge saw from Dual Power is ideal for cutting openings in OSB and chipboards. The saw is equipped with a Ø89 mm saw blade giving a maximum cutting depth of 28 mm. This is why the saw is suitable for making cabinets, walk-in wardrobes and more. Moreover, this cordless circular saw can also be used for cutting boards and laminates.

Depending on the mounted saw blade, this Dual Power saw is also suitable for stone tiles and soft metal sheets with a maximum thickness of 3 mm. The three-part guide rail ensures perfectly straight plunge cuts. It can be secured with clamps to prevent accidental shifting.

Precise parallel cuts are possible thanks to the side guide. Also included is a laser that clearly indicates the cutting line. The patented three-part acceleration module makes a noticeable difference during work. This is why the tool works more smoothly and less force is required when sawing.

The saw foot ensures the necessary safety. When the saw is put down, the foot rises automatically so that the saw blade does not touch the surface. Moreover, the saw cannot start accidentally thanks to the double safety switch.

### Separate battery and charger

The battery and charger are not included. They are sold separately and are suitable with the whole Dual Power range.

### Which Dual Power batter is compatible?

This 20V mini plunge saw is compatible with both a 20V and a 2x20V Dual Power battery. Using a 2x20V battery provides a considerably longer working time compared to the regular 20V version.
