TELESCOPIC MITRE SAW 20V - POWDP2560

The POWDP2560 telescopic mitre saw from Dual Power is the ideal tool to cut planks and baseboards to size. Because it is a battery-powered tool, it can be used exactly where it is needed. Nonetheless, it has plenty of sawing power and a rotation speed of 3300min⁻¹. The turntable and tiltable head are equipped with a precise scale. This allows to precisely set the sawing angle.

The telescopic head ensures a large cutting capacity. With a cutting capacity of 60x220mm for regular cuts and 30x150mm for 45° bevel cuts, the saw offers an extensive range. The extension arms offer the much needed stability when working with longer planks. The clamp secures the workpiece, so the Ø210mm saw blade can do its work safely.

A double safety switch, overload protection and spindle lock provide the necessary safety while working. The soft grip handle ensures a pleasant working experience. A perfect view of the cutting line is guaranteed thanks to the precision laser, dust collector bag and the vacuum cleaner connector.

DISCOVER THE ENTIRE PRODUCT RANGE AT
WWW.DUAL-POWER.COM

Separate battery and charger

The battery and charger are not included. They are sold separately and are compatible with the whole Dual Power range.

Which Dual Power batter is compatible?

This 20V telescopic mitre saw is compatible with both the 20V and 40V Dual Power batteries. The use of a 40V battery ensures an even longer battery run time, compared to the use of a 20V version.
