FINISHING SANDER 20V - POWDP50300

This cordless 20V finishing sander from Dual Power is ideally suited for sanding down larger surfaces. The sander delivers with its up to 24000 sanding motions per minute, plenty of power to get even larger jobs done quickly. The device is ideal for sanding down large, flat surfaces like doors or closets.

The Dual Power sander's rectangular sanding plate measures 187x90mm and is equipped with a handy hook & loop system. The plate is perforated, so that sanding dust can be transported into the dust collector bag. It is also possible to use regular sanding paper, thanks to the clamp system.

The softgrip provides the necessary grip and control while sanding. With its dustproof switch, the Dual Power sander is durable as well. The battery operated device is easy to use and allows for hassle free work, without the hindrance of any (extension) cords.

WWW.DUAL-POWER.COM

Separate battery and charger

The battery and charger are not included. They are sold separately and are compatible with the entire Dual Power range.

Which Dual Power battery to use?

This 20V finishing sander is compatible with both the 20V and 40V Dual Power batteries. The use of a 40V battery ensures an even longer battery run time, compared to the use of a 20V version.
