## AIR PRESSURE PUMP 20V - POWDP7020

This cordless POWDP7020 air pressure pump of Powerplus will save you a lot of time and trouble, because you don't need to use a large compressor or extension cables. It inflates sport balls, air mattresses, but also car and bike tyres. The pump is supplied with 3 adaptors to adjust your tool to the activity. They can be nicely stored away in the built-in storage on the machine.

The air debit of no less than 30l/min and the powerful 20V battery help you realise all these tasks on site too. The clear digital pressure gauge with presettings and autostop (after 8 minutes) shows you the right pressure (max. 8 bar). The flexible hose and LED worklight enable you working exactly on the spot you wish.

DISCOVER THE ENTIRE PRODUCT RANGE AT  
[WWW.DUAL-POWER.COM](http://WWW.DUAL-POWER.COM)

### Separate battery and charger

The battery and charger are not included. They are sold separately and are compatible with the whole Dual Power range.

### Which Dual Power battery to use?

This 20V air pressure pump is compatible with both the 20V and 2x20V Dual Power batteries. The use of a 2x20V battery provides an even longer battery run time, compared to the use of a 20V version.
