## SOLDERING IRON 20V - POWDP7060

This cordless 20V soldering iron from Dual Power is ideal for model building and smaller soldering jobs. The cordless design of this battery soldering iron makes it perfect for use in hard-to-reach places and areas without a power supply.

The cordless soldering iron reaches a temperature of 200 °C in just 10 seconds. The temperature is adjustable and can thus be selected to suit the job in hand, up to a maximum of 480 °C. The built-in work light provides a good view of the workpiece.

This Dual Power tool comes with a stand. It allows you to rest the soldering iron safely while working. An indicator light also clearly indicates when the soldering iron is on and, therefore, warm. The ergonomic soft-grip handle ensures the necessary comfort.

DISCOVER THE ENTIRE PRODUCT RANGE AT  
[WWW.DUAL-POWER.COM](http://WWW.DUAL-POWER.COM)

### Separate battery and charger

The battery and charger are not included. They are sold separately and are compatible with the whole Dual Power range.

### Which Dual Power battery to use?

This 20V wet/dry vacuum cleaner is compatible with both the 20V and 2x20V Dual Power batteries. The use of a 2x20V battery provides an even longer battery run time, compared to the use of a 20V version.
