# ANGLE GRINDER 1200W | Ø125mm

This angle grinder from Powerplus has a medium grinding wheel of Ø125 mm and is especially suitable for light grinding jobs and for deburring smaller surfaces. The tool is easy to operate and fits well in the hand. The angle grinder has good manoeuvrability, which is ideal for use in confined spaces.

The ergonomic soft-grip handle ensures a good grip, together with the additional handle. It can be mounted in three different positions. This makes it easy to control the grinder during any job.

The 1200W motor gradually builds up the speed. This means that the tool does not start up suddenly and safety is guaranteed. The grinding wheel is easy to replace without tools, ensuring optimal ease of use.
