## LAWNWOWER 1800W

This high quality lawnmower comes with a powerful 1800W induction motor and a solid steel housing, which can withstand repeated use and any weather condition. With a cutting width of 46cm and a large 60 litre grass collector, it can mow a large lawn in an instant.

The cutting height can be adjusted in 7 positions from 30 to 90mm. So you decide to cut the grass short or longer. Apart from collecting the cuttings into the large grass collector during mowing, you can also go for the mulching option. Grass clippings are mulched into very fine pieces which are excellent to feed the soil in your garden.

Large ball bearing wheels and an adjustable handle height make this solid lawnmower highly manoeuvrable. To improve the operator's comfort, the POWPG10240 is equipped with a soft grip handle which is foldable for compact storage. For your safety, it's possible to fit the extension cord to the cable relief. In that way you can never unplug the power cable by accident. A power indicator tells you whether the machine is plugged in.
