POWX00410 SCREWDRIVER 7.2V LI-ION

The Powerplus POWX00410 is a cordless 7,2V screwdriver for smaller DIY-tasks. This compact device enables working very practically in tight areas. With the operating switch you can choose between fastening and loosening. When pressing the lock button, the screwdriver can't be activated for safety reasons. The quick release chuck and magnetic bit holder make it very easy to change bits.

Thanks to its rotatable handle with soft grip, you hold and turn the Powerplus screwdriver very comfortably. Moreover the different torque settings (20 + 1 drill function) are useful to adapt your activities to the material without damaging it. The LED worklight accompanies you in narrow poorly lit spaces.

The Hex screwdriver comes with a charger, a magnetic bit holder and 12 bits. The status indicator tells you the charge status of the battery.
