POWX04761

DRYWALL SANDER 710W

This Powerplus drywall sander provides welcome assistance for sanding walls and ceilings that are made of drywall or plaster. Thanks to his tube extendable up to 165cm and the 4m flexible pipe, there is no need to search for a ladder. Quite different from conventional finishing methods. You can keep on working comfortably on the floor.

The adjustable sanding head and the LED work light offer the POWX04761 just that little extra: your work area gets larger in every respect. It is illuminated in the best possible way and the flexible sanding head adapts effortlessly to your sanding surface, enabling you to sand a large area without changing position.

With his powerful 710 motor and adjustable speed from 600 up to 1500min⁻¹, the device produces an unprecedented result without any grooves. It is also designed to work in conjunction with a vacuum cleaner for minimum dust.

The POWX04761 comes with 6 pieces sandpaper that can quickly be replaced thanks to the hook and loop system. The sander's disc diameter amounts to 215mm, what makes him suitable for a 225mm diameter sandpaper. The support foot protects the extraction hose when positioning the machine on the floor.

TECHNICAL SPECIFICATIONS POWX04761		Features	Box content	Symbols
