POWX04960

POLISHER 120W | Ø240mm

This polisher from Powerplus is ideal for making painted surfaces shine again. It is suitable for polishing cars, motorcycles and even boats, but also for removing superficial scratches on car bodies.

The 120W motor provides the necessary power. The polishing disc has a diameter of Ø240 mm. This is enough to polish even larger surfaces. Thanks to the two soft-grip handles, the machine is easy to control for optimal results. The locking switch ensures the necessary ease of use.

The polisher comes with a polishing cover. It is ideal for applying and rubbing out the polish and wax or for smoothing out imperfections in the paint. The included sponge polishing pad adapts perfectly to the contours of the workpiece.
