**ANGLE GRINDER 750W | 2000W**

This is a set of 2 angle grinders you can use to grind, sand, deburr, or remove rust from metal and stone.

Both grinders are equipped with a quick clamp system and a spindle lock, so you can easily and safely replace the cutting disc without the need for additional tools.

What makes these angle grinders so safe to use, are the included safety guards, which offer the best possible protection for your hands. Use the open cover for grinding and the adaptor when cutting. This ensures that you will always be able to work safely with any of the saw blades included.

The soft handles provide a firm and comfortable grip. The angle grinders come with 2 extra handles, so you have even more control over your machine. The 2 m cables guarantee the necessary freedom of movement during use.

The 750W angle grinder with its Ø115 mm disc is perfect for working in small areas. Thanks to the compact design, handling is easy and the tool can reach a higher rotational speed of 12.000 min<sup>-1</sup>. For optimal user comfort, it is fitted with a lock-on switch for continuous use.

The 2000W angle grinder is more powerful and perfect for heavy-duty grinding and deburring. Thanks to the Ø230 mm cutting disc, this angle grinder can cut much deeper. The soft start lets the engine start slowly and build up to its full speed, so you can maintain control at all times.

Lastly, this set includes 2 segmented diamond saw blades, 2 turbo segmented saw blades, and a high-quality nylon toolbag for easy transport.
