POWX1170 HAMMER DRILL 750W

You can use this electric hammer drill in 4 different modes: hammer, hammer/drill, drill and chisel rotation. Switching from one mode to another is easy with the mode selector with safety lock. The speed itself can also be controlled and set from 0 to 1050min⁻¹. The hammer drill has a double pendulum rod bearing that guarantees an extremely strong impact energy. Its power is an impressive 30% higher than a hammer drill without this ingenious system. With its 4900 impacts per minute, you can attack concrete, steel and wood with no effort at all.

The depth stop comes in very handy for pre-set hole drilling. The auxiliary handle can be fitted to suit both right-handed and left-handed handymen. Delivered with an SDS Plus-type key chuck with adapter, a pointed and flat chisel, three drills and a dust cap.
