FEATURES

- Microcontroller (MCU).
- Winter mode: allows charging and maintaining batteries at low temperatures.
- Fast/slow charging.
- Suitable for all types of lead-acid batteries, AGM batteries and gel batteries.
- Safety protection (short circuit, overload, low voltage, over discharge, heat, overcharge, reverse connection, high voltage...).

POWX4201 SMART BATTERY CHARGER

The Powerplus POWX4201 is a smart battery charger for car, motorcycle, boat, lawnmower and mobile home batteries. This trickle charger is suitable for 12V Gel, AGM and lead-acid batteries with a capacity between 3 and 60Ah.

Its intelligent micro controller unit provides a safe and ideal charging speed throughout. Just before the maximum capacity is reached, the charger will switch to a lower current, so that a full charge is reached carefully.

The smart charger is ideally suited for maintaining and charging batteries that have been standing still for a long time. The pulse charging method prevents the battery from getting discharged too deeply and therefore getting damaged. Thanks to its winter mode, the Powerplus charger can also be used in low temperatures.

8 led lights show the chosen mode and the current battery percentage clearly. The charger is easy to use and is equipped with a 150cm long power cable. It is also dust and waterproof, as well as protected against short circuit, overload, low voltage, over discharge and overheating.

TECHNICAL SPECIFICATIONS POWX4201		Features	Box content	Symbols
Rated Voltage - Frequency	220-240V~ 50Hz	<ul style="list-style-type: none"> • 8 LED display • Automatic charging • Dust and water resistant • For lead acid battery, AGM battery and gel battery • Microcontroller (MCU) • Winter mode • Safety protection • Fast/slow charging 	1x smart battery charger 35W	
Rated power	35W		1x power cable 1,5m	
Battery voltage	12V==		1x manual	
Battery capacity	3-60Ah			
Charging current	2A			
Cable length	1.5m
