POWX480

WELDING MACHINE 160A

This welding machine is designed to weld electrodes from 2mm to 4mm. Depending on the size of the electrodes, you can regulate the current from 55A to 160A. A scale clearly marks the chosen setting and an overheat indicator will fully protect the device and secure your safety.

This reliable welding machine is easy to set up and can therefore also be operated by occasional welders. The POWX480 is delivered with a steel brush/welding hammer and a welding mask.

TECHNICAL SPECIFICATIONS POWX480		Features	Box content	Symbols
Output current	55-160A	<ul style="list-style-type: none"> • carrying handle • overheat indicator • current scale • current regulation 	1x welding machine	
Rated voltage - frequency	230V~ 50Hz		1x steel brush / welding hammer	
Electrode capacity	Ø2-4mm		1x welding mask	
Protection class	Classe I		1x electrode clamp & earth clamp	
Power factor	0,73 cosØ		1x manual	
Cable	3m
