Powerplus POWXG30033 is a useful and handy garden tool to trim lawn edges or borders. Places you cannot reach with your lawnmower can easily be finished with this 500W grass trimmer. Also helpful to cut longer grass. The adjustable trimming angle and edge roller make it useful as side edge cutter. The Powerplus trimmer has a flower protect guard to protect plants and shrubs whilst trimming. The large auxiliary soft grip handle is easily adjusted and the aluminium shaft extended from 120 to 150cm. All to improve the operator's comfort.

Furthermore there is no need to reload the cutting line while working thanks to the patented intelligent thread lengthening system. A time saving invention! The cutting line measures 4m (double threaded/straight) and has a 1.6mm diameter. It is protected by a safety guard.

With the POWXG30033 you will enjoy a proper lawn finishing. Comes with one mounted spool and an extra free spool with 4m twisted wire (double thread) excellent for heavy duty use or to trim thick, heavy weeds.
